

IMPLEMENTATION OF STANDARD PACKAGING

PURPOSE

To Ensure: Safety

Quality

Timeliness

Cost Efficiency

Maximize Transportation and Storage Space

When Developing Packaging Consider the Following

1. Ensure Part quality
2. Ensure Standard Lot Sizes
3. Eliminate Transit Damage
4. Minimize Waste
5. Minimize Packaging cost for the supplier & DMTN

The main goal of our supplier packaging requirements are to standardize the size of the shipping pallets and improve utilization of storage facilities at DMTN. Follow these guidelines as closely as possible. Written documentation must be obtained from DMTN PCA to use non-standard packaging.

CURRENT SUPPLIERS	DMTN Purchasing and Packaging will review current supplier packaging information.
NEW SUPPLIERS	Starting 06/01/2000 all suppliers quoting new business will be required to follow these guidelines for quoting and shipping.
NOTE: All Cost Issues will be addressed by DMTN Purchasing. Regardless of packaging approval all pricing must be negotiated with DMTN purchasing. All packaging cost must be submitted at time of RFQ in purchasing requested format.
